

WARTS: POST-TREATMENT CARE

1. Warts usually have a black or crusty appearance within 24 hours after treatment.
2. You may apply an ointment of choice and non-stick dressing for comfort.
3. If a blister develops, treat it as a wound.
4. Treated tissue usually sloughs within 1-4 weeks.
5. Deep tissue injury and prolonged wound healing may occur.
6. More than 1 treatment may be required (4-6 weeks apart).

Please contact our office at (318) 442-9395 with any questions.
